Highfrequency

- for shielding high-frequency electromagnetic waves
- very good tear resistance with soft quality, antistatic, elastic
- 100 % textile properties
- elastic knitted fabric for a wide range of applications
- organic cotton, kbA (controlled organic cultivation)

The New Antiwave quality is a right-left jacquard knit, in a combination of combed organic certified cotton and silver coated polyamide.

The coating is not made of controversial nano-silver, but of pure silver that surrounds the entire polyamide fibre. The precious metal silver is absolutely harmless to human health and to nature.

Pure silver has a natural antibacterial effect and can also have a positive effect on skin problems as well as excessive sweating and body odour.

Thanks to the innovative fabric construction and the use of high-quality materials, this knitted fabric protects against electromagnetic radiation in the range from 20 kHz to 10 GHz with an efficiency of > 97 %. This is confirmed by an expert opinion by the EMF test lab Bavaria.

Also available by the metre and particularly suitable for making shielding clothes.

New Antiwave is a high-quality, easy-care fabric with a high-quality finish that ensures that the shielding properties remain intact even after several washes. Due to the antibacterial effect of the silver, it is sufficient to wash the laundry at 30 - 40 °C.
